

## SET-IN SLEEVES:

### Full Flare Sleeve:

This is a sleeve drafted on the rectangle, and, when finished, will look like a capelet sleeve. It can be gathered at the hem with elastic or into a narrow cuff to create a puff, or can be just hemmed.

For this you need to modify the bodice front and back. In the illustration, you will widen from A to A' at the cross front (or cross back) by 1/2 in. (1.2cm). Also, lower the armhole at the side seam, from B to B' by 3/4 in. (1.8cm). Re-draft the armhole, and take the total measure, front and back.
